

Chester Zoo song
Sustainability

It's a beautiful world but the earth is crying.
We've got temperatures high, the rain forest is dying and the green will be washed away.
It's a beautiful world but the earth is crying
It's time to readdress this is our SOS
And the future starts today

So let's all think about what we don't want to lose
How stuff is made and the things we use
It's time to think about what we really need
It's time to connect for Sustainability

Woah Sustainability x2

We've got to find a way to keep things going.
Without damage and cost of the animal loss
So reduce and reuse and recycle
And you might believe
That this doesn't matter to you
But lots of things we need come from the planet and trees
Keep our environment clean

So let's all think about what we don't want to lose
How stuff is made and the things we use
It's time to think about what we really need
It's time to connect for Sustainability

Woah Sustainability x2

It's a beautiful world but the earth is crying.
It's time to readdress this is our SOS
And our future starts today
